

Doo-Right™

for the environment, you and your pet.

The 100% natural, biologically active and safe way to handle your pet's waste (doo). Doo-Right will reduce odor, unsightliness, and quicken the decomposition of pet doo into natural organic material that is good and safe for the environment.

Sprinkle Doo-Right onto your pet's doo until well-covered, add to cat litter box, bird cage pans, or pet pads. Upon its contact with the doo, bad smells, flies and pesky insects will disappear, and useful compost for plants and soils will be produced. If smells persist add more Doo-Right.

**In-place
pet waste
treatment™**

Carry a smaller bagful while walking the dog, add to your cat's litter, or sprinkle onto your pet's waste tray. Doo-Right protects and betters the environment for you and your pet. Doo-Right has a pleasant sweet fermented smell.

Doo-Right is also Bokashi Center's trademark for "Bokashi." Doo-Right is comprised of photosynthetic bacteria, lactic bacteria, and yeasts, known as EM-1[®], which is Organic Materials Review Institute listed, for organic gardening purposes. Doo-Right restores nature's goodness by use of these natural, safe and beneficial microbes that render pet doo into nutrients and antioxidants that are useful for plants and soil. Methane (greenhouse gas) and hydrogen sulfide (bad odor) gases are also reduced, which is good for planet earth and good for you and your pet.

Ingredients: Wheat mill run, water, EM-1[®], molasses. Made in Hawai'i.
